Founder's Day And Fall Convocation Ceremonies To Be Enacted Tomorrow

Chancellor E. W. Beatty, K.C. To Confer Degrees On Graduates—Dr. W. W. Chipman To Give Founder's Day Address — D.Sc. Degree To Be Awarded — Grenadier Guards In Traditional Ceremony During Afternoon.

THE annual fall Convocation of McGill University will be held to-morrow at noon in Moyse Hall. The chair will be occupied by E. W. Beatty, K.C., and he will also confer the degrees upon the successful candidates. Among the degrees which the Chancellor will present will be that of Doctor of Science, the highest scientific award which the University can bestow. This is to be conferred upon William James McNally, B.A., M.D.C.M. (Dalhousie), M.Sc. (McGill), for research work in Physiology. It is only very rarely that one of these degrees is awarded by the University.

As in past years, the ceremonies of Founder's Day will be observed at the same time as Convocation. Dr. W. W. Chipman, emeritus professor of obstetrics and gynaecology, and also a governor of the University, will deliver the Founder's Day address after the degrees have been presented to the graduates by the chancellor.

In the afternoon between the hours of four-thirty and five-thirty p.m. the traditional ceremony of Founder's Day will take place. According to custom, a detachment of approximately twenty-five Canadian Grenadier Guards will post a guard at the tomb of James McGill. In addition to being the founder of McGill University, it must also be remembered that James McGill was the first colonel of the Grenadier Guards. All the drill will be of a ceremonial nature. The display, which will be held in front of the Arts Building will be enhanced by the presence of the brass band of the Canadian Grenadier Guards. This organization will play while the sentry boxes are being set up in front of the tomb. The ceremonial drill, which should not last more than an hour, will be in the command of Lieutenant Thomas H. Carlisle, who is in Law '35 at McGill University. The reviewing officer for the occasion will be Colonel Molson, who is also a Governor of the University.

As previously announced, all lectures beginning at twelve noon tomorrow will be cancelled in order that the Convocation can take place. The soldiers in the afternoon will be in full dress and it is hoped that many students will take advantage of the opportunity to view this ceremony in honor of the founder of McGill University.

List of Successful Candidates

The following is a list of those to receive degrees:

In the School for Graduate Nurses

Certificate in Public Health Nursing.

Jean Josephine McKinlay, Glace Bay, C. B., N. S.

In the Conservatorium of Music

Killam, Doris W. (Licentiate Performers' Class) Saskatoon, Sask.; Spencer, Marguerita (Licentiate performers' Class) Saskatoon, Sask.; Laurie, Jessie Scott (Licentiate performers' Class) Saskatoon, Sask.; Phillips, Sadie (Licentiate Performers' Class) Saskatoon, Sask.

Degree of Bachelor of Science In Agriculture (B.S.A.)

Bovell, Paul Egerton Reece, Spanish Town, Jamaica, B.W.I. (In absentia); Nixon, William Arthur, Chesterfield, England. (In absentia).

FACULTY OF ARTS AND SCIENCE

Passed for the Degree of B.A.

Dobson, Kathryn Janet, Montreal; Hallett, Robert Bruce, Cardiff, Wales; Joseph, Henry, Jr., Montreal; Lambert, Percival John, Skibbereen, Ireland; LeBel, Louis Pierre, Namur, Que.; Lee, Priscilla, St. Lambert, Que.; McAuley, Mary Angela, Brockville, Ont. (In absentia); McKeown, Emily Marion, Montreal; Place, Ronald Edson Grenfell, Pointe Claire, Que.; Schwab, Pauline, Westmount; Tait, Ragnhild, Westmount (In absentia); Vissenger, Lillian, Montreal.

Passed for the Degree of B.Sc.

Cornell, Douglas Anderson, Westmount; Dixon, Gerald Harris, Montreal; Neeland, William Daniel, Fort William, Ont.

Passed for the Degree of B.Com.

Ebbitt, Stuart Nevison, Montreal; Estano, Verne William Turrill, Westmount; Hudson, Ray Marjorie, Westmount.

Degree of Bachelor of Engineering (B. Eng.)

Kingston, Edgar Lloyd, (Civil), Prescott, Ontario; Lockwood, Clarence Kingsley, (Chem.), Westmount; Perego, Henry Anthony (Civil), Notre Dame de Grace; Peterson, Joseph Julius Al-

(Continued on page 3)

Lectures Cancelled

All 12 to 1 lectures on Saturday, October the 6th, Founder's Day, will be cancelled to enable members of the staff and students to attend Convocation which takes place in Moyse Hall at 12 noon.

T. H. MATTHEWS,
Registrar.

Comic Opera To Be Played During Coming Season

Enthusiastic Group Attend First Meeting Of Choral And Operatic

The first meeting of the Choral and Operatic Society of the McGill University for the year 1934-35 was held in the Ball room of the McGill Union last night. An enthusiastic group of students discussed plans for the season ahead, and it was found that, if matters work out as expected, an enjoyable year is in store for members of this organization.

T. Calder, Law '36 took charge of the meeting after the minutes of the previous session had been read by the Secretary-treasurer, R. Place. Owing to the fact that the D'Oyley Carte Light Opera Company will be touring the United States and Canada sometime during the coming season, it will be impossible to present a Gilbert and Sullivan opera. However, a comic opera can be obtained which holds high possibilities of providing entertainment, according to the description. Mr. Cooper, a musical leader in the city of Montreal, was present at the meeting, and described to those present briefly the plot of the light opera and the settings which surround the comedy. Fuller details concerning the activities of the Choral Society relating to this production will be available in a few days for those who are interested.

It is understood that a general meeting in the form of a social entertainment will be held in the near future. Further details of this event will be published in plenty of time so that those students wishing to attend may make arrangements to do so.

Dinner After Game Tomorrow Evening

First Meeting Of New McGill Branch

The McGill Society of Ontario have secured a block of tickets for the McGill-Toronto football game on Saturday. Students should not miss this game, particularly as McGill lost only three players last year, and it is likely that this season will belong entirely to McGill.

As in previous years the Annual Reunion dinner will be held at 7.15 at the Royal York Hotel, Saturday after the game. This dinner will be the first meeting of the new society, the McGill Sosiety of Ontario. The formation of this society has awakened such enthusiasm throughout the province that the largest turnout on record is expected.

The name of the speaker remains a mystery, but we are assured that he is one of the most outstanding McGill men in the country, and that his message will be of interest to all.

Messrs. Doug. Ross and Grant Glassco will be in charge of the entertainment and Rex Battle will supply the music.

All McGill men are cordially invited to the dinner. Those wishing to make reservations for the game or dinner are asked to get in touch with the Montreal branch of the Graduates' Society.

Teaching Problems Reviewed By Body Of Noted Educators

Professor Clarke Attends Convention In South Africa

REFORMS DEMANDED

Better Training For Teachers Deemed Essential

With singular modesty Professor F. Clarke, of the Department of Education at McGill, refrained from discussing his own work abroad this summer beyond admitting that he had been invited to a convention of The New Education Fellowship, a body of distinguished educators, in South Africa. Professor Clarke, however, consented to discuss the work accomplished by that convention, whose aim is to try and inculcate modern ideas into education.

"Amongst the most popular and successful at the convention," stated the speaker, "was Mr. L. Lismer of the Toronto Art Gallery, who succeeded in stimulating great interest in the possibilities of Art in education." He took with him an exhibition or artistic work done by Canadian school pupils, including the work of some pupils from Montreal."

Educational Problems

"South Africa is suffering from the same educational disease as the other countries — tyranny of examination, rigidity of curricula and organization, dictatorial methods and all the rest, which seem to be, but probably are not, inevitable in organization of educational work on a national scale."

"On every hand there seems to be a longing for increased initiative in teachers and pupils, for greater flexibility and adaptation in school courses, and for drastic reform in the whole system of examinations. There can be no doubt that the conference did help materially in working out the lines and possibilities of such reform."

Better Standard

"One prominent topic in the conference was the training of teachers, and opinion was overwhelmingly in support of the view that the first and main essential was the teacher's own education. On all sides a demand was heard for a raising of the average level of general culture and training among teachers. With this went a strong plea for increase of the teacher's autonomy in his own domain."

Among those taking part in the conference were Dr. John Dewey, famous American educator and author of many works upon the subject of education, Harold Rugg of England, Miss Helen Parkhurst, Pierre Bovey, head of the Jean Jacques Rousseau Institute of Geneva, D. T. Hankin, English authority on the films, Dr. Boyd of the University of Glasgow, and Dr. Van Der Leeuw, famous educational authority of Holland.

New Appointment

Professor Clarke has been appointed to a post in London as Advisor to University Students, especially those from overseas. The main duty is to develop facilities for study among students and administrators throughout the Empire. After a distinguished career in South Africa, where he served for over eighteen years as Professor of Education at the University of Capetown, he joined the staff of McGill University in a similar capacity. This new position was largely created, according to the speaker, through the generosity of the Carnegie Corporation and Professor Clarke will be its first occupant. He expects to leave for his post in London towards the end of January.

Department of Physical Education for Women

Class lists are posted on the bulletin board of this Department, and the Arts Building. Please notify the office at once if conflicts occur. All classes start Oct. 9.

Students enrolled in Swimming will please meet the instructor in the corridor outside the door of the Physical Education office before the first class. Do not go direct to Montreal High School. The Fencing Class has been scheduled for Monday 2-3 p.m. Students enrolling will need equipment amounting to $5.00.

Golf Match Professors vs. Students

Circulars have been sent to Professors who wish to play in the annual match on the morning of October 11th. In case any professors have not received such notice, they are requested to send their names, telephone numbers and handicaps to the Secretary, Department of Physical Education, before noon on Tuesday.

Ushers for Tomorrow's Game

The following will report at the Stadium on Saturday at 1.15 to usher at the Montreal vs. Toronto game: P. Vaughan, R. Vaughan, Bourne, Gibson, Anderson, McGibbon, McCallum, Baranofsky, Gillman, Chadwick, Birks, Watters, Walkley, Kaufman, Casseman, Russell, MacOdrum, Rathay, Barker, Frank, A. Mendelsohn, Derby, Convoy, Mackay, Cohen, Stedman, Reid, Greenblatt, H. Mendelsohn, Schofield, Robinson, Roy, Ross, Gregson, Shizgal, Lazarus, Hendelman, Thompson, Tomink, Elliot, Beecher, Porter, Zatz, Ruddick, Spellane, Doran, Luterman, Barnard, Fraser, Heron, Graves, Cohen, Ashkenazy, Golf, Fuller, C. Macdonald, Ein, Greenwood, Annett, Flych, Laing, Van Scoyoc, Taylor, Outhit, Wigdor.

It is important that the above mentioned turn out.

University Band Opens Season On Monday At Game

THE McGill University band is rapidly shaping itself into something worthy of its name under the leadership of its director, Mr. Harry Norris. Many of the old members are still with the band and those who are new are quickly learning the scores assigned to them. A great deal of work, however, is yet in store for this organization before it makes a public appearance. If everyone is present at the daily practices, it will facilitate much in bringing the band up to the standard of previous years.

The first appearance of the band will be on Monday, October 8, which is Thanksgiving Day. When the McGill Senior rugby team tackles the Montreal A.A.A. on Monday next, the McGill band will be out there doing its best to help McGill to a victory. It should prove an attraction to those at the game.

There will be a meeting of the Class of Arts '36 in Room 20 of the Arts Building at One o'clock this afternoon.

Increased Demand Marks Day's Sale

Book Exchange Turnover Exceeds Expectations

Yesterday morning witnessed one of the heaviest selling booms which the McGill Book Exchange has experienced in many years. Within a very few hours all of the large stock of books in popular demand had dwindled to a negligible extent. As a consequence many students were unable to obtain any texts at all. Some idea of the spirited buying which took place may be had when it is realized that the day's receipts closely approximated one thousand dollars.

The Exchange committee are confident that there are still many books in existence which have proved their usefulness and would find a ready purchaser if they were turned in. With this idea in mind a list of the depleted stock is published below and sale of any one is practically guaranteed. Van der Smissen's German Grammar, Gerber's Marchen und Erzahlungen, Kimball's College Physics, Schlesinger's General Chemistry, Porter's Carbon Compounds, Mass and Steacie's Introduction to Physical Chemistry, Borradaile's Manual of Zoology, Alden's Prose Selections of the Nineteenth Century, Page's Nineteenth Century Poets, Murray's Differential and Integral Calculus, Lamb's Calculus, Tate's Interest Annuities and Bonds, Dawson and Gettys Introduction to Sociology, Duncan and Starling Heat, Light and Sound, Barnard and Child's Algebra, Keys Laboratory Book of Physics, Duff's Physics, Allen's Greek Grammar, Canadian Revised Trigonometry, Nicholson and Brennan Translations. The Shakespearian plays of Hamlet, Othello, Antony and Cleopatra, A Winter's Tale, Henry the Fifth, and all second year French texts are greatly in demand, as well as A Modern Symposium and The Trial and Death of Socrates.

The Book Exchange will continue selling all day today from nine till five-thirty and will receive new stock in the morning. A set of drawing instruments and a few loose-leaf notebooks have recently come into its possession and will gladly be disposed of. The committee is made up this year of Manager Ronald Leathem, Antony Chapman, Stephen Walbridge and Leonard Picard.

Conversat At Hall Enjoyed By Frosh And Upperclassmen

Murray Brooks Welcomes Newcomers To Headquarters Of S.C.M.

PIT PROVIDES FOOD

Partners Converse With Each Other Instead Of Dancing

Great festivity marked the Conversat's first gathering of the season, when Freshmen and Freshettes had an opportunity of greeting each other informally in the stimulating company of Upperclassmen, of whom there were a goodly number.

The evening's festivities opened with Freshmen and Upperclassmen joining in singing McGill songs in a joyful burst of harmony. The Conversat afforded excellent opportunity for Freshmen and Freshettes to become acquainted as conversation took the place of dancing, partners conversing with each other for the space of several minutes.

Following the Conversat, an excellent supper, furnished by the Pit, was served to all. An extra 'Discourse' was then enjoyed, after which the program in the Auditorium took place.

Wm. Braisted, President of the S.C.M. and Lorne Gales, President of the Student's Society then delivered speeches of welcome to the newcomers at the University. Deborah Barbour, President of the Women's Union, welcomed the Freshettes in her address.

A novelty feature of the program, hitherto veiled in great secrecy, was a questionnaire on points of interest of McGill University, answered with humour and wit by some member of the audience.

Those heading special committees were Ida Curtis in charge of the Student Committee, and Dorothy Somers in charge of refreshments and decorations.

Mrs. Vaughan very graciously attended the Conversat as guest of honour.

The Host of the evening was Murray S. Brooks, Warden of Strathcona Hall, who greeted newcomers with his usual geniality.

Norman Jennison, Com. '36, was in charge of the music, accompanying the singing of both McGill and popular numbers.

Among Freshmen were:

Bill Barnard, Louis Shean, Ted Sheffield, Lorne Hamilton, Byron Higginson, Bill Chadwick, Marg. Dubee, Vera Sessenwein, Jane Carroll, Beatrice Barclay, Dora Mitchell, Joan Brodie, Wanda Douglass, Ruth Hause, Eleanor Whyte, Eileen Munro, Eileen Ferguson, Marjorie Mitchell, Sylvia Stober, Annie Crack, Jean Mullally, Elizabeth Wright, Peggy Crawford, Elizabeth Hordy, Peggy Atkinson, Evelyn Lancaster, Kay Derdy, Margaret Stewart, Catherine Boggs, Peggy Archibald, Hal Lorimer, Doris Marsh, Della Allen, Kathlen Probart, Peggy Boyd, Isabel Wilson, Emily Adams, Margaret Garland, Elinor Cronyn, Pat Brockington, Eileen Kingsley, Lillian Coplan, Esther Salomon, Betty Wood, Catherine Scofield, Peg Gilbert, Gordon Roy, Sheila McFarlane, Marion McIlquham Catherine Dickinson, Donald Rennie, Albert Malouf, Winifred Robson, Elinor Morse Arnold Buchanan, Barry Elliott, Rensworth Scott, Dick Birks, George Duncan, Sam Mislap, Lyon Kaufman, Bert Love, Lloyd Alford, Leonard Orr, Grant Asplin, Gordy Eastwood, Ron Mercer, Roy Crabtree, Fred Gibson, Sam Porter, Eunice Winegar, Carol Hecks, Joan Savage, Enid Cushing, Elinora Adams, Ruth Oliver, Sylvia Howard, Bernice Bigley, Marg Sweet, Bunny Webster, Effie Atbury, Dot Taylor, Laura Fraser, Doreen Beck, Ruth Orr, Marg McDonald, Charlotte Slabotsky, Rose Beiss, Wally Murray, Robert Barker, Roger Hackley, Gulius Metrakos, Tom Lockwood.

Daily Staff

On account of the Thanksgiving holiday being on Monday, there will be no Daily printed that day. Monday night's staff of reporters should consult the assignment book not later than one o'clock on Saturday afternoon. Reporters must check off the assignment listed opposite their names and sign on the opposite page.

The following reporters are expected to work on Monday evening: W. H. Ashkenazy, A. Anderson, A. E. Hawes, Catherine Dickinson, W. Finklestein, M. Gold, Alix. Johnstone, John Mainwaring, Mark Frank, T. H. Montgomery, D. A. Savage, Juanita de Shiell, Donald Smith, S. David, Chas. Tessier, S. R. Zatz.

Student-Professor Golf

The annual golf tournament between the Students and Professors will take place at the Royal Montreal Golf Club on Thursday, October 11 (Sports Day). Entry lists are placed in the Arts, Engineering and Medical Buildings.

McGill Scullers Bid With Varsity For Rowing Title

LAST minute reservations may still be made at the Union up till five o'clock for accommodation in the busses which are chartered to follow the McGill-Varsity rowing match in its entirety. The busses will leave the campus at two-thirty tomorrow and will follow the scullers from start to finish. Judging from last year's exhibition the McGill boatmen should give a good account of themselves, and may quite conceivably spring a bombshell by coming out on top, an event which has not happened for seven years. A special yacht has been chartered in order to accommodate all honorary members who so desire it thus viewing the race from a point of vantage. The rowing team are in good condition physically and everything points to an intensely exciting afternoon.

Lectures Cancelled

Monday, October the 8th being Thanksgiving Day, all lectures will be cancelled.

T. H. MATTHEWS,
Registrar.

Record Attendance At S. C. M. Meeting

Discussion Led By Dr. Henry N. Wieman Of Chicago

The largest and most representative attendance in years featured this year's conference of the Central Area of the Student Christian Movement at Y.M.C.A. Park, Lake Couchiching, from September 12th to 21st. McGill was well represented by students, nurses, graduates and leaders. Delegates came from the Universities of Toronto, Western, Queen's, McGill, O. A. C., Manitoba, Saskatchewan, Alberta, British Columbia, Acadia and Dalhousie in Canada. There were also thirteen delegates from American movements. A total of 193 students, graduates, leaders and visitors were registered.

The speaker chosen to lead the discussion on the theme of the conference, "The Christian Message for Today," was Dr. Henry N. Wieman, professor of philosophy at the University of Chicago. Dr. Wieman discussed the main topic in a series of lectures in which the spiritual and social aspects of religion were balanced. His addresses comprised, in order, the following topics: God at Work in the World Today, The Religious Needs of the Individual Today, The Religious Needs of Society, How to Connect with God, and How to Connect with the Work of God in Society Today.

Addresses were delivered by Dr. Regina Westcott Wieman, Dr. Gregory Vlastos of Queen's, Dr. W. J. Rose of Dartmouth College, Prof. T. W. L. MacDermott of the League of Nations Society at Ottawa, Prof. J. King Gordon of Montreal, Prof. G. Wasterleys of Toronto, Mr. Raymond Currier of the Student Volunteer Movement at New York, Mr. C. E. Silcox of Toronto, and Mr. J. B. Bickersteth, of Hart House.

An innovation of the conference this year was that the discussion groups confined their study to the main theme of the conference. The groups were led by Prof. Martyn Estall of McMaster University, Rev. E. L. Wasson of Toronto, Dr. R. B. Liddy of Western, Dr. and Mrs. Gregory Vlastos of Queen's, Mr. Beverly Oaten, General Secretary of the S.C.M. of Canada.

Attention Freshmen!

Will all Freshmen who are able to usher at the Montreal Argo game on Saturday or the McGill-Montreal game on Monday, or both, please leave name with either Bill Gentleman in the Arts Building, or Bert Yates in the Union Tuckshop. They will report to the Stadium Manager, John Taylor in the Field House by 1.15 the day of the game. Admission will be obtained at the pass gate on University Street.

Reporters

There still remain a few vacancies on the staff of the Daily for Sunday and Thursday evenings. Anyone interested in working on either of these evenings will be cordially welcomed.

Anyone who feels they are gifted with the literary urge, and would like to contribute regularly to the feature page of the Daily is asked to get in touch with either the Editor-in-Chief or with the Feature Editor, Arthur Bloomfield.

Complete List Of Extension Courses Issued To Public

Many New Subjects Supplement Lectures Offered Before

COVERS WIDE FIELD

Full Information May Be Had From Extra-Mural Relations Department

Several days ago there appeared in the columns of the Daily a partial list of the Extension Courses delivered by the University under the Direction of the Department of Extra-Mural Relations. The list of the courses of lectures offered has finally been completed and is printed below in entirety.

Many of the subjects offered this year are new, and supplement those given in former years. The majority of the courses begin the week commencing October the 16th and take place in the different buildings about the campus. Registration will take place on the day of the second lecture in each course, and the fees will be payable at the same time.

New Subjects

Amongst others, a new course is being offered by Dr. W. D. Tait of the Department of Psychology at McGill, dealing with the psychology of childhood through its different phases. The subject is one of importance to teachers and parents alike, especially in view of the everchanging conditions of our modern day life. In addition to this Dr. Tait is offering another course of an introductory nature on general phychology.

Amateur astronomers will be given an opportunity to obtain a scientific grounding on the subject, through a series of lectures by Dr. A. Vibert Douglas—the Solar System, stars and constellations motions of the stars, distances of the stars, chemistry of the stars, Binary and Variable stars, Nebulae, star clusters, and the Milky Way, the Universe of Spiral Galaxies.

Subjects Offered

The following is a complete list of all the lectures—and any further information needed may be had from the secretary of the Department of Extra-Mural Relations.

Art

Periods of Art History, 6 lectures, illustrated. The Ancient Orient, Greece, Rome, Byzantium.

Lecturer: Prof. F. P. Chambers.

Time: Tuesdays, 8 p.m., commencing October 16th.

Place: Engineering Building.

Fee: $3.00.

Periods of Art History. 6 lectures, illustrated, 2nd term. The Middle Ages, the Rehaissance, recent times.

Lecturer: Prof. F. P. Chambers.

Time: Tuesdays, 8 p.m., commencing January 8th, 1935.

Place: Engineering Building.

Fee: $3.00.

Astronomy

Astronomy. 10 lectures, illustrated with slides, models and experiments. The Solar System, stars and constellations, motions of the stars, distances of the stars, chemistry of the stars, Binary and Variable stars, Nebulae, star clusters and the Milky Way, the Universe of Spiral Galaxies.

Lecturer: Dr. A. Vibert Douglas.

Time: Mondays, 8.15 p.m., commencing October 15th.

Place: Physics Building.

Fee: $5.00.

Astronomy: 2nd term. Additional illustrated lectures on selected topics from the following:—Eclipses of Sun and Moon; the nearest stars; the Romance of Sirius; the Romance of Betelgeuse; the Romance of Mizar; the Nature of Light; the Spectra of Sun and Stars; Gravitation; Age of the Universe; Unsolved problems in Astronomy; Cosmic Rays; Novae—nature's greatest cataclysms; Historic Telescopes; Time, Clocks, and the Calendar; Theories of Cosmology.

Lecturer: Dr. A. Vibert Douglas.

Time: To be arranged.

Place: Physics Building.

Fee: To be arranged.

Biology

Social Biology. 6 lectures, illustrated. Characteristics of living matter; heredity and environment; population problems; races and race welfare.

Lecturer: Prof. H. B. Fantham.

Time: Tuesdays, 8.15 p.m., commencing October 16th.

Place: Biological Building.

Fee: $3.00.

Chemistry

Fundamental Principles as applied in Industry. 10 lectures. A course dealing with processes commonly met in modern industries. Fundamental principles will be discussed and these appropriately applied.

Lecturer: Dr. W. H. Hatcher and Dr. J. B. Phillips.

Time: 8.15 p.m. First lecture to be given Thursday, October 18th, when permanent time will be arranged.

Place: Chemistry Building.

Women Cheer Leaders

WE have been noting sadly the constantly decreasing enthusiasm in the cheering sections at McGill football games the last few years. Each year is worse than the year before till finally we have reached the depths of lethargy shown last Saturday when not even one feeble cheer for Old McGill was heard. Something must be done about it.

In the first place bad as the lack of cheering is in itself, it is what it denotes that is even worse, for it denotes just this—that college spirit is dead and buried. The incoming students of the last few years instead of being proud of McGill and her traditions are too ashamed or too lazy to spontaneously shout the old yell which was shouted to the skies both here and abroad before they were even born. Enthusiasm is the birthright of youth. We hate to feel that the present generation is getting blase and wasting the best years of their lives by affecting a spurious sophistication which leads them to self-consciously hide any emotion or enthusiasm which they may feel. They have to be urged to cheer, and when they do so they do it in a self-conscious timid way, looking at their neighbour out of the corner of their eye to see whether he is going to cheer or not and immediately cease doing so if he isn't.

In the second place lack of cheering is actually harmful to the chances of the team itself, for it is very heartening to the players to feel that the students are behind them not merely looking on critically. Finally, it is bad for the gate receipts. For many years the chief interest in college football to many people was the gaiety of the crowd, the half-time demonstrations, and so forth. Playing a far inferior brand of football, the college teams were still able to draw larger crowds than the other leagues due to that intangible quality known as college spirit. Now that this has gone people outside the college are not supporting the games the way they used to with the result that gate receipts are falling off badly, as can easily be seen by a glance at the half empty stands at any of the big college games of the last few years.

How can we remedy this sad state of affairs? The main remedy lies with the students themselves. If they absolutely refuse to lend the team their vocal support, nothing in the world can make them do so. But we have a suggestion to offer which might help—Why not have co-eds for cheer-leaders? We certainly think that they might persuade the fans to cheer where male cheer leaders fail. Some attractive co-eds dressed in white skirts with red sweaters and little hats in McGill colours would form a very pretty picture and might arouse the interest of even the most lethargic. They might be supplied with red and white slickers for rainy days, and these would no doubt be equally becoming.

We note that Jack Waud has been appointed head cheer-leader. We congratulate him on his appointment and consider him well-suited for the post. As a well-known humorist and expert in the art of pantomime he should make an excellent cheer-leader. But we suggest that he get a corps of sweet young co-eds to assist him and help brighten things up when the game gets dull, and may we once again hear ringing loud and clear into the October skies the honoured battle-cry of yore "Fight, Fight, Fight, McGill."

Equipment and Tools

AN echo of the words of Dr. Gordon Holmes, world-famous neurologist and author, uttered in the course of his Foundation Lecture at the opening of the Montreal Neurological Institute last week, induces one to pause and reflection. The eminent surgeon in eulogizing the elaborately equipped research centre warned against over-emphasis and abiding faith in fine equipment. He in no way deprecated the conveniences and increased utility of modern facilities but merely laid greater stress on the spirit of those engaged in research rather than in the actual working materials. By way of illustration Dr. Holmes reminded his listeners that the majority of the great scientific discoveries of the past were made through the use of more or less crude apparatus.

It must be admitted that there does exist today a tendency to over-estimate the value of facilities be they a musical instrument or an improved implement of agriculture. There is a classical argument that a real musician can get good music from an instrument however poor it may be. Our ancestors probably produced as good crops from soil tilled with a sharp stick as the modern farmer with his tractor-drawn plough. The example of the successful student who has prepared himself by the assiduous use of text books which barely hang together may also be cited.

None the less, even in the face of these facts there is a real delight and a pure satisfaction arising out of the possession and use of new and proper equipment. It is in itself a source of inspiration behooving one to strive for higher and greater things as fitting tribute to the means at his disposal.

Looking Backwards

The following editorial is one taken from the Daily files of over sixteen years ago, written at a time when the better part of the civilized world was engaged in bitter strife.

It appears to us that we can explain the functions of the Daily no more clearly than by reprinting an excerpt from it.

"NOW that the work of the session is at last under way it may not be out of place to reassert the functions and purpose of our daily college publication. This is desirable, not merely with regard to those who have but recently entered McGill and are more or less unacquainted with the place which the "Daily" occupies in our college life and activity. Unfortunately ignorance in this connection is likewise prevalent among upperclassmen and, though it may be presumption to write it, among members of the staff.

"Such ignorance, whether wilful or otherwise, is extremely unfortunate not merely from the point of view of the minority directly interested in the welfare of the "Daily," but from the standpoint of the undergraduate body as a whole, of which "McGill Daily," is the official organ.

"It is most desirable in the interests of our college publication and in those of the individual student, that a general and real understanding prevail regarding the status and constitution of the former. To this end therefore we are seizing the opportunity, while the session is still young, to bring the matter before the attention of the student body.

"First of all it is important to grasp the fact that the "Daily" is the official organ of the Students' Society, to which organization belongs every undergraduate who paid the universal fee. Being such, the newspaper is controlled by the Students' Council, and thus is essentially official.

"The actual editing of the "Daily" is dependent upon voluntary effort on the part of members of the undergraduate body. Little comprehension of the great amount of work involved in the production of our college paper is possible to one who has not had actual experience in its connection. That the burden has rested upon the shoulders of a very few has been one of the regrettable features of the last two years of the "Daily's" history, and it has apparently been inevitable owing to the fact that time and again the staff has been almost entirely depleted.

"With the commencement of another session, however, and moreover one which apparently presents brighter prospects than its immediate predecessors, it is only reasonable to expect renewed enthusiasm and co-operation in connection with the publication of the "Daily." We at McGill can pat ourselves on the back and boast of editing the only college daily in Canada, but if our actual individual interest extends no further than giving its columns a glance each morning our pride and college spirit is but skin deep.

"In short, the task of editing the "Daily" is no joke. It involves hard work continuously. And yet it must be done by someone unless an institution, of vital importance in college life, is to be allowed to drop out of existence.

"Each and every undergraduate connected with McGill should feel some personal responsibility and obligation in this matter. There are numerous and various ways of rendering assistance, only one of which is by personal work in the editorial office.

"With regard to the average Freshman, who may not as yet have found his bearings, we may say that he may be of real service to the "Daily" if so inclined. It is necessary, however, to repeat that the production of the college paper involves the necessity for real effort and not infrequently a certain amount of self-sacrifice."

PEN PORTRAITS
BY ANALYST

A personality attractive and charming but difficult to describe because of its elusive character. Of medium height, slender but wiry physique; black, wavy hair slightly gray at the temples . . . a deeply tanned face whose every line and furrow bespeaks thought and life . . . a mouth of extraordinary mobility whose changes of expression are as fleeting as lightening itself . . . Now suggestive of sly humour, again, expressive of scepticism or scorn. And above this, a pair of dark eyes that look extraordinarily kind. His speech is clipped, clear, rapid, precise. His lectures so interesting that only serious illness or some such cause would prevent attending them.

He may criticize some aspect of your work and in so doing say things that hurt badly, yet, a smile and a few explanatory words, and all is forgotten . . . he pokes fun at economists, lawyers, Parliamentarians, politicians, women, in fact, everybody except historians . . . like the ancient Biblical characters, he figuratively thanks the fates that he was born a man. Nevertheless he has a keen and discerning eye for colourful and unusual effects in feminine attire.

But even more interesting is his personality as revealed by his spoken thoughts. His wit is as keen as the sharp edge of a blade; it is mentally stimulating, it is amusing, it is at times very caustic. Heaven help the butt of one of his "bon mots." He seems to harbour few illusions, judging from the numerous cynicisms that flow from his lips and yet . . . I warrant that it only cloaks a nature that is at once sentimental and even romantic, a nature so sensitive that it shrinks instinctively from the many shoddy things in life, a nature that longs for, and loves the beautiful things in life.

(Editor's Note: This is the first of a series of pen portraits of Professors and members of the Faculty at McGill. Later on in the session a further series of portraits will be offered with prominent students as the subjects.)

LISTENIN'-IN
BY ELENPY

Let's Get Acquainted

The radio has become an integral part of our modern society. It is the best medium for the spread and propagation of all the best ideas of our time. Next to the newspaper it is the most potent instrument of propaganda that we possess. Preeminently, however, the radio is an instrument of entertainment. The ether waves bring us the best the latest in the realm of music as well as fiction. It is for the purpose of pointing out the best that is in radio that this column is being run.

New Program

Lovers of operatic stars will agree with me when I say that a great treat is in store for us in the new series of programs to be inaugurated on Saturday October 6th at 9.00 p.m. The new series will feature the well-known star of the Metropolitan Opera, Rose Brampton. Miss Brampton, a contralto of no mean ability, will sing "The Songs You Love," and will be accompanied by the inimitable Nathaniel Shilkret and his orchestra. The addition of Billy Hillpot and Scrappy Lambert to the list of vocalists on the same program promises to make this one of the most enjoyable dial-bits of the week. The program will feature not only classics of both the heavy and light variety, but also the best of the popular tunes of the day, as well as folk-songs, so listen to it on an NBC-WEAF Network.

♦ ♦ ♦

Tibbett The Man

The return of Lawrence Tibbett to the air marks a gala event in the history of NBC. The new series of programs featuring the renowned baritone is now in full swing. Mr. Tibbett is presented to us "not merely as a voice", but also as the man of his everyday life. The tall, handsome singer of the Metropolitan Opera, who has swept everything before him in a short period of time, sings to us as he has never before sung over the air. In addition to singing he also tells some interesting episodes of his eventful life. Accompanied by Wilfred Peltier, conductor of the Metropolitan Opera orchestra, Mr. Tibbett rises to undreamed-of heights. His program, one of the most interesting, is to be heard on an NBC (CFCF) Network every Tuesday at 8.30 p.m.

♦ ♦ ♦

Now How're You Like That?

Very few of my readers have to be introduced to George Givot, owner and sole operator (or maybe I should have said slayer) of the Acropolis Number 7. The versatile Greek ambassador with the typical dining-room accent is back on the air with a bang! His cooking is of the best available, and he displays something which many other comedians fail to show — originality. There is not a dull moment in his show from the moment it starts until the announcer bids the audience "Good-bye!" The program, heard on Tuesdays at 10.00 p.m. over a CBS (CKAC) Network is the ideal tonic for the student who has really come to college to do some studying.

♦ ♦ ♦

Successful Fiction

The award of highest merit which went to the program "One Man's Family" was well deserved. It has been brought to my attention that when the Western Division of the National Broadcasting Company inaugurated this broadcast they did so with palpitating hearts. In brief the officials of the company were doubtful as to the success of the experiment, for such it was. However, the nation-wide response which the program has since evoked has proved its efficacy and large measure of entertainment. From a mere experiment in the broadcasting of a novel the program has become a landmark in national entertainment. In many homes it is a necessary part of the family ritual to listen to the weekly doings of the Barber family. "One Man's Family is dedicated to the mothers and fathers of the younger generation and to their bewildering offspring." Let's have more of the kind! (By the way the time of the broadcast has been changed to 6.00 p.m. on Saturdays.)

♦ ♦ ♦

Westerner In The South

Despite the tradition that Southerners sing lilting melodies and Westerners are content with "The Last Round-Up," Mildred Bailey, famous Western "Blues" singer, is being starred in a new series of three-times-a-week programs over an NBC Network. The program, occurring on Mondays, Wednesdays, and Fridays at 7.15 p.m., bears the name of "Plantation Echoes." Miss Bailey, the girl with the deep, dynamic "Blues" voice is a discovery of Paul Whiteman. This in itself should be enough of a recommendation for the program. However, when we mention that the instrumental part of it will be handled by Willard Robison, "evangelist of rhythm," we feel sure that the program will gain a large and appreciative following. Good luck, Miss Bailey!

ELENPY.

COLLEGE COMMENT

THE COLLEGE STUDENT

Among the many stupendous changes taking place in the world today, is the evolving of a new type of college student. If one will open his eyes and observe, he will note that he is being permitted to witness an upheaval in the development of the young generation.

The war era and its succeeding, approximate 15-year period brought to us a swift, giddy, and thoughtless group of people. The college student is not different or worse than the rest of the population but gives you an emphasized view of the trends of the day.

However, anyone who has been thrown with the college group for the past three years has noted a change. The "rah-rah" boy is already "old stuff." It has long been unfashionable at the better schools to engage in the unreasonable type of football rallies.

The day of the "polite moron" seems distinctly past. Time was when the impeccable frame of this personage loomed large upon the campus horischolars were dirt before his elegance. He trod the campus amid the jingle of many watch chain keys, the aimless flop of the 20-inch bell bottoms and the aroma of gin, perfume, and ignorance. But his day is definitely doomed on the campus. Somehow it has taken the depression to suggest to young men and women that one doesn't succeed in life by failing in college and that courtesy and smartness in the polite sense make the gentleman and the lady. Such is the evolution as it walks hand in hand with fate and time.—Kentucky Kernel.

EDUCATION FOR POLITICAL LIFE

"I never scratched a ticket in my life. I've had to hold my nose lots of times, but I always voted 'er straight."

Such was the proud statement of the chairman of a Kansas county committee of one of the major parties recently. It throws a little light on the questions of why men hesitate to admit that their chief interest in life is politics, and why no respectable student cares to undertake politics as his profession.

American politics at present is not a profession. It is a game, to be played for the excitement it offers. In rural communities it is played principally by old men, settled in their political habits to the observance of such rules as "Never scratch a ticket!" In some large cities it is played by unscrupulous grafters, obviously, and defiantly for nothing more than graft.

Politics could be made into a respectable profession by the participation of young men and women motivated by a desire to improve government, rather than merely to get certain men into elective and appointive offices because they have been good party men for years.

Universities are in an advantageous position to assist in this change. In the first place the university is the logical agency for the study of political methods and of ways in which they could be improved. To the university belongs the job of training expert career politicians. In the second place the university brings together young people of average intelligence or above, who with their university training, would have a beneficial influence in political organizations and relieve the word "politician" of its unpleasant connotation.—Daily Kansan.

YOU CAN'T FORGET PICOBAC

"Sometimes I forget my hat. Sometimes I forget my glasses. And sometimes I forget my watch. But I never forget my Picobac. I always know I've got it on me somewhere,—one pocket or another.

"You know, there's something about the flavour of Picobac that lingers in your mind. You don't forget it. You don't want to forget it. When I have to go away some place Picobac is the very first thing I pack. I don't want to be caught out on the end of a limb without a supply.

"Do you know what Picobac means? The pick of Canada's Burley crop. Take a pouch or tin of Picobac home tonight with you. Try it—I'll guarantee you'll never forget it. Why? Because it's such a mild . . . cool . . . sweet . . . smoke. That's why.

"And don't forget, you get more tobacco for your money. Good for making cigarettes, too."

Toronto Crew Here To Vie With Redmen On Canal

Blueboy's Total Weight About Equal To McGill's

Visiting Crew Composed Of Young Inexperienced Men With Exception Of One Veteran — Equality In Weight Important Factor In Race—Molman's Rowers Determined To Wrest Intercollegiate Crown From Opponents—Large Number Of Enthusiasts Will Be On Hand To Witness Contest Tomorrow—

THE Blueboys hailed into town from Toronto last night with a brand new crew confident of success on the canal tomorrow. With an added ten pounds per man, making a 160-pound crew, any lack of experience together is more than balanced by increased brawn and a determination to hold the intercollegiate title.

Only One Veteran

Of the team that came down from the Queen City last year, only one, Bradshaw, is still at his oar. The rookie eight has been working together since last spring and during the summer they have faced the best Canadian competition, giving good accounts of themselves, but sadly lacking in wins.

Willis at stroke tips the scales at 170 as do Eaton at number six, and Millyard rowing three. Bradshaw who is Captain, pulls the bow oar. The rest of the crew includes Miller, number seven; Jack MacDonald, five; Haig, four; and Pete MacDonald, number two. McClatchie does the shouting as cox.

Coach Tommy Louden, who has trained the Varsity crew for the race against McGill for the last six years, sees no real reason why his 1934 eight should not give the same performance and carry off the honours as his men have done for the last four seasons.

Different Style

The Toronto crew does not use the Continental style which Molmans uses with his McGill oarsmen. Instead of the straight back and pause on the stroke, the Varsity men row with a rounded back and their stroking is continuous. This form has been used by American crews with marked success. There is little to choose between the two styles. The Continental affords a rest on the pause but the latter makes the stroking much easier. Which ever one is employed, perfect unison in stroking is essential.

The McGill crew, in their practice last night, drilled on the fine points of stroking over a five mile work-out on the canal. Molmans seemed quite pleased with their work. The line-up remains unchanged and the boys are well broken in to the new boat. Their positions are: stroke, Lorne Gales; two, Moe Blumer; three, Louis Johnson; four, Louis Vacsek; five, Bill Butler; six, Bill Carter; seven, Pep Bourne; and eight, Harold Elliott, cox, Paul Chevalier.

Louis Johnson announces that all but a very few of the tickets for the observation busses have been sold and that anyone who still wants reservations must get in touch with him or Paul Chevalier soon.

History of Event

Of the eight times that Varsity and McGill have rowed for the intercollegiate title, the Torontonians have been victors six times while the Redmen have won but twice. There has usually been an advantage on the side of Varsity in weight. Last year the weights of the two crews were practically equal and Toronto won by only a very slight margin. This year both squads are again equal on this score. Perhaps McGill has a little advantage in the fact that her men have had more experience in rowing together. However breaks and strategy are the important factors determining the victors. What they will be and how they will be used remains to be seen tomorrow.

Intermediate Rugby Squad Commences Schedule Tomorrow

Meets Eastward In Initial Tilt At East End Grounds

FROSH ALSO ACTIVE

THE Intermediate football team, that much neglected branch of McGill football activities, will get a chance to display its worth tomorrow afternoon against the equally unheralded Eastward team in the first game of the Q.R.F.U. schedule. This season the Q.R.F.U. is operating a three-team league, due to the withdrawal of Westward and the granting of a bye in league fixtures to Ottawa Rangers, who nevertheless take part in the play-offs. Eastward proved the "saviour" of the league when things looked black with McGill and C.N.R. the only entries. They have succeeded in attracting several experienced men to their unpretentious grounds and quarters in the East End of the city among them "Slug" Segatore and Maurice McAlear, former Loyola stars; "Eppie" Epstein and Freddy Worrell, formerly of Westward; Bill Middlemiss, Bob McNab, and others.

Ralph St. Germain, coach of the Red seconds, is confident that his team is heavy enough to handle this rugged array. Walker Wagner, Matheson, Bishop, and Savage are the kingpins of the team, which, beside containing quite a few of last year's Intermediates, has also a good number of last season's Freshmen. Practices have been going seriously only since the opening of classes on Monday, owing to the poor turnout of candidates previous to that date. Coach St. Germain now has a group of over thirty men from which to pick his team for tomorrow's game. An important practice is being held this afternoon for the purpose of selecting the team from the following list: Matheson, Loftus, Black, Gould, Deakin, Macdonald, Walker, Fleming, Dawson, McDowell, Cohen, Burrill, Latour, Lowles, Wagner, Law, Savage, Bercoson, Goldstein, Weber, Brissenden, Starr, Laing, Langston, Doheny, Bishop, D'Avignon, Scott, Piper, Gurd, Ashkanase, Hemens, and Lagimodiere.

Leave at One

The team will leave the clubhouse shortly after one o'clock on Saturday, proceeding by bus to the Eastward grounds at the corner of Notre Dame and Letourneau Sts., in Maisonneuve. It is hoped that there will be a good representation of students on hand at the game to support the team.

Meanwhile the Freshmen have not been idle either, what with carrying the Seniors around on their backs, as one Frosh expressed it after a particularly hard session against the big fellows. Indications point to the best team in several years, with a hard-hitting line, a fast backfield, and several fine kickers. There is a chance that two teams will be formed, one for the Junior Intercollegiate League, as well as the usual entry in the Intermediate college loop. Plans, however, are not yet definite, due to injuries suffered by some of the principal men. An important practice is called for this afternoon, which all men who have tried out for the team are expected to attend. Two teams will be picked for a practice game to take place Saturday morning.

Tennis Stars Are All Prepared For College Tourney

Entry List Definitely Closes Today—Murray Favored

ALL ENTRIES for the annual college tournament must be in today at 5 p.m. at the courts. The draw will be posted in Tuesday's Daily. The entry fee is fifty cents. This tournament is a valuable aid in selecting the intercollegiate team as well as the college champion.

The McGill team has an excellent chance of copping its third consecutive intercollegiate championship. Murray, Robertson, Surveyer, Wiele, and Schwartz are five of the leading contenders for the team and all will be seen in action on the courts. Murray is the present captain of the team.

The intercollegiate meet will be held this year on the campus courts, McGill's own home grounds.

FIELD GLASSES NEW RUGBY STUNT

Local football games, and the McGill game at Toronto this week-end will likely see the beginning, on a large scale, of a new "help" for spectators. Those fans not fortunate enough to have drawn "sideline" seats have always been under the disadvantage of missing a lot of the fine and important points of play. No doubt the majority of them would have provided themselves with field glasses, and thus bring the play "right up into their lap," had not the price of field glasses been too much for the average bankroll.

Not so this Saturday, however — for now everyone can take along a pair of good power field glasses — for only one dollar. This is made possible by a record-breaking offer by The T. Eaton Co. Limited, who have secured a quantity of reliable, 4-power glasses to sell at the lowest price ever marked on dependable glasses. Figuring it out, it's really a shewd investment, for even though you draw only inexpensive seats to all the sporting events this fall and winter, with the aid of a dollar pair of field glasses you're sitting right down on the sidelines — or right up at the ringside, whichever the case may be.

Freshman Football

An important practice will be held this afternoon. Every man who has tried out for the team is expected to be present. Two teams will be picked for a practice game on Saturday morning.

Football Team Entrains For Queen City

Senior Gridmen To Play Varsity In Inaugural Tilt

Redmen Leave At 3 Today For Tomorrow's Clash With Intercollegiate Champions — Shaughnessy's Shock-Troops In Fine Condition For Fray—Week Of Bone-Crushing Practices Leaves Squad Anxious For Actual Competitive Combat — Blueboys Report Young But Well-Balanced Team. . . .

THE senior football squad leaves town today at 3 p.m., Toronto-bound, where they meet the intercollegiate champions tomorrow afternoon in the opening struggle of the 1934 season. It will be a pretty happy bunch of pigskin-pushers boarding the train for the Queen City. Most of the jollity will undoubtedly be occasioned by the fact that a long week of blistering, back-breaking training has at last been completed and the beginning of actual combat has arrived. Coach Shaughnessy put the boys through their paces for about five solid hours at the Stadium last night, with every department of the game receiving a thorough overhauling.

Smith Works Hard

Joe Smith, who has yet to receive his baptism in the Canadian senior intercollegiate fires, seemed to get the lion's share of the work last night. Shag had him tearing around the field like a demon, calling signals, running and passing, with the accent on the latter portion of his duties. Most of his passes were pretty accurate, but the men at whom they were directed seemed to be having a hard time hanging on to them. Maybe it was the cold night air. Whatever it was, though, a surprisingly small number of throws were completed.

A short scrimmage session against the intermediates featured the evening's play. The big Redmen scored one touch on the second play of the game, after they recovered the ball on the scrub's five-yard line following a fumble, and added another five points on an on-side kick with Wally Markham gathering in the leather behind the second team's line. Markham showed up well throughout the short scrimmage. He and Smith seemed to be the only two Seniors able to make any headway by running with the ball. The first line had no trouble at all stopping numerous scrub plunges. All in all, the scrimmage was a pretty tame affair, demonstrating that the Senior line will hold like a rock, which seems to be a well-known fact anyhow, and that the old caustic tongue of Joseph Francis Shaughnessy has lost none of its vitriolic pungency, which is also a well-known fact. Joseph Francis was in fine fettle, and his many witticisms anent the effeminate blocking, tackling and covering of some of his charges carried all over the field, to the huge delight of several hundred avid rubbirds.

Kicking Only Fair

Johnny Riddell and Bob Craig were booting a ball to each other in a corner of the field, with both registering respectable distances at fairly frequent intervals. Tom Richert did most of the kicking in the scrimmage, none of which was anything to get excited about. This department of the Shaughnessy Shocktroops is still highly problematical, and the question of its excellence will only be settled tomorrow afternoon. However, Herbie Westman is expected to join the forces some time next week, which should aid the cause immensely.

McGill will take the field in Toronto tomorrow with a tried and tested line, a potentially great backfield and a doubtful kicking staff. Add to these characteristics an undoubted fighting spirit, no injuries to speak of, and an undeniable will to work together, and you will get some idea of the team which will face the tough Blueboys, last season's intercollegiate titleholders.

(Toronto, Oct. 5, Special to McGill Daily)

WHEN the long grind toward an intercollegiate football title gets under way at the Varsity Stadium Saturday, Warren Stevens will send into action one of the lightest and youngest teams to wear the blue and white in several years. Despite their youth and lack of experience, the team which Andy Henderson, Captain for the coming year, will lead against the McGill Redmen will be one of the best balanced squads to represent the University in some time.

Backfield Indefinite

The backfield has had a particularly large number of eligible candidates working for positions and the choices for these positions will not be definitely known till the game begins. The rear guard is young but fast. The vacancy left by the graduation of Jack Sinclair as kicking half has been ably filled by Bob Isbister who is now in his sophomore year. Isbister looks to be one of the most effective booters to be unearthed in the Varsity camp in several seasons. Bobby Coulter who was a sensation in his first year in senior company last season is again in action and will probably be assisted by Art Upper, who worked with the Argos last year. Several other promising backs are out but Coulter, Upper and Isbister are the logical choices for the starting line up.

On the line Grady, Laing and Gus Grecco are the most effective plungers, while Hennessy and Dawson at flying wing have both been impressive in practice.

Two Games

The team has had two games in the city series during the present season. The first they lost by a 9-5 score while they won the second game quite handily, scoring a 12-0 shutout over the Balmy Beach Senior O.R.F.U. In the second game the students looked one hundred percent better than in their initial appearance and will likely improve as the season goes on.

The past week has been spent in scrimmage practice. The early workouts were against the intermediate club, while Wednesday night the team concluded their training with a scrimmage practice against St. Michael's, the team who defeated them in the city series.

Senior Footballers

Will the following football players meet at the Field House, 12.30 this morning: Smith, Riddell, Markham, Craig, Richert, McLernon, Byrne, Wigle, Stockwell, Hedge, Hornig, Drury, Degnan, Mack, Ruschin, Letourneau, Carsely, Young, Robb, Pierce. Lunch will be served at 1.30, and everybody will then go to the station for the Toronto train.

SWIMMING AND WATER POLO

There will be a regular practice tonight at 5.30 in the K. of C. tank. All regulars and all others interested are are asked to turn out.

Soccermen Open Season In Game Against Sun Life

Play Tomorrow Afternoon On Upper Field

THE turnout for soccer to date has been excellent, and much new material of real worth has been unearthed. Two newcomers who seem to have the "stuff" are Cannel of L.C.C. and Thatcher of Harvard, who will put up a fight for a forward berth. Substitute material for the first team is unusually good—better than it has been for many years, and it augurs well for both first and second teams.

Some of last year's men who are still missing would be heartily welcomed, especially Bruce Jones for the Centre Forward position, Cooper finding it impossible to turn out. Jim Harkness, captain of the team, has failed to turn out as well for one of the full back berths.

Game Tomorrow

The schedule begins tomorrow with a game on the Upper Field against Sun Life, and continues with each succeeding Thursday under the floodlights and on Saturday afternoons.

The first Intercollegiate game is a return match with Springfield, who took the measure of the McGill team two years ago in Montreal. This will be the first game of a double-header on the same program as the Queen's-McGill rugby game, October 13th.

The line-up for tomorrow is:

Goal, K. Evelyn; R.F.B., Angel; L.F.B. Garber; R.H.B., A. Minnion; C.H.B. G. Owen; L.H.B., H. Horsnall; O. R., B. Innes; I.R., J. Nolan; C.F., R. Flood; I.L., J. Feltner; O.L., F. Lowe.

Alternates: Cannell, Luxton, Smart, Rivett, Thatcher, Layton.

These men may reserve their passes at the Officials' gate, Molson Stadium, University Street entrance.

GOLF

All players having a provincial handicap of ten and under, who wish to try out for the golf team please call T. Calder at the Law Bldg. or at EL. 5917.

Place: Chemistry Building, McGill University.

Fee: $10.00.

Advanced Course. 25 periods. For those who have a fair knowledge of the French language. Includes diction, advanced grammar, discussion.

Lecturer: Miss Idola Saint Jean.

Time: Wednesdays, 7.30 p.m., commencing October 17th.

Place: Mechanics' Institute, corner of Atwater and Tupper Streets.

Fee: $10.00.

Genetics

An introduction to the study of heredity. 15 lectures. An outline of general genetic principles leading up to heredity in man and a discussion of eugenic problems.

Lecturer: Dr. C. L. Huskins.

Time: Mondays, 8 p.m., commencing October 15th.

Place: Biological Building.

Fee: $7.50.

German

Elementary Course. 25 lectures. General survey of German grammar and the structure of the German language. It should enable the student by the end of the session to carry on the study of German on his own account. Opportunities will also be given for conversational practice.

Lecturer: Miss S. G. Solomon.

Time: Wednesdays, 8 p.m., commencing October 17th.

Place: Chemistry Building.

Fee: $10.00.

Reading Course. 25 lectures. This course is intended for students knowing no German, and desiring only to acquire a reading knowledge of the language. There will be no practice in either writing or speaking. Grammar will be treated only as arising out of the texts read.

Lecturer: Miss S. G. Solomon.

Time: Tuesdays, 8 p.m., commencing October 16th.

Place: Chemistry Building.

Fee: $10.00.

Greek

Greek for Beginners. 40 lectures. This course is offered especially to teachers who desire to gain a reading knowledge of Greek, and it is possible that a more advanced course will be offered the following year to those who desire to continue their study.

Lecturer: Prof. P. F. McCullagh.

Time: Mondays and Thursdays, 4.30 p.m., commencing October 15th.

Place: Arts Building.

Fee: $10.00.

History

World History—from the latter days of the Roman Empire. 25 to 30 lectures. This course will not give a mere general skeleton survey of world history. Instead it is intended to devote each lecture to a fairly detailed study of some movement or important personage, so that emphasis may be laid upon the factors that have proved most vital in the progress of civilization. This should appeal (a) to the general public, by bringing before them the origin and development of world conditions of today, and (b) to teachers of world history, by aiding them to determine and understand those parts of this vast subject upon which stress should be laid.

Lecturer: Prof. E. R. Adair.

Time: Wednesdays, 8 p.m., commencing October 17th.

Place: Arts Building.

Fee: $10.00.

ITALIAN

Elementary Course. 25 lectures. Pronunciation, grammar, reading, conversation, dictation, correspondence. Text books required: Grammar—"Sauer-Motti;" Reader—"Pinocchio" (Collodi); any good dictionary.

Lecturer: Dr. Alfred Fossati.

Time: Fridays, 8.15 p.m., commencing October 19th.

Place: Chemistry Building.

Fee: $10.00.

Advanced Course. 25 lectures. Grammar, reading, translation, conversation, dictation, musical terminology, composition, personal and business correspondence, concise histry of literature, study of chosen prose and poetry. Text books required: Grammar —"Sauer-Motti;" Reader—"Chore" (De Amisis); any good dictionary.

Lecturer: Dr. Alfred Fossati.

Time: Wednesdays, 8.15 p.m., commencing October 17th.

Place: Chemistry Building.

Fee: $10.00.

Prizes have been awarded by the Italian Foreign Ministry for the student attaining the highest standing in each of the above courses.

Law

Canadian Constitutional Problems. 6 lectures. This course is devoted to a discussion of current problems in the Canadian constitution. It will contain a description of the essential features of the constitution; the distribution of legislative powers between the provinces and the Dominion; the method of amending the B.N.A. Act, the international position of Canada.

Lecturer: Prof. F. R. Scott.

Time: Wednesdays, 8 p.m., commencing October 31st.

Place: Law Lecture Room.

Fee: $3.00.

Metallurgy

Metallography. 15 periods. This course is essentially practical, the lectures given are with the view of enabling the student to understand why he goes through the various operations. Specimens of metal, iron, steel, brass, bronze and white-metals are prepared for examination under the microscope. Some are heat-treated by the student and progressively examined. No previous knowledge of the subject is required. The object is to get acquainted with the inner life and activity of metals.

Lecturers: Messrs. Harold J. Roast and Bernard Collitt.

Time: Wednesdays, 7.30 p.m., commencing November 7th.

Place: Chemistry Building.

Fee: $15.00.

Iron and Steel and their Heat Treatment. 15 to 20 lectures and demonstrations. Subject matter covered includes: the manufacture and properties of iron and steel; the several processes of heat-treatment; methods of inspection and testing; introduction to metallography.

Lecturer: Prof. Gordon St. G. Sproule.

Time: Mondays, 8 p.m., commencing October 15th.

Place: Chemistry Building.

Fee: $13.00.

Music

Violin Technique with practical illustrations. 2 lectures.

Lecturer: Mr. Norman Herschorn.

Time: Tuesdays, 5.30 p.m., commencing October 16th.

Place: Conservatorium of Music.

Fee: $1.00.

Nutrition

Nutrition. 30 to 36 lectures. Foods, body requirements, body processes, meal planning, diets for children, adults, etc.

Lecturer: Miss Myrtle Hayward.

Time: Wednesdays, 8 p.m., commencing October 17th.

Place: Biological Building.

Fee: $10.00.

Food for Health. 16 to 18 lectures. This course will cover such subjects as: Helpful knowledge in planning meals; food requirements for child, for adult; calories in relation to age, weight and occupation; planning luncheon and dinner menus; food budgets, etc.

Lecturer: Miss Myrtle Hayward.

Time: Fridays, 8 p.m., commencing October 19th.

Place: Biological Building.

Fee: $7.50.

Ornithology

Natural History of Birds. 10 lectures. The subjects dealt with include evolution of birds, structure and function, flight, habits and behaviour (courtship, song, migration, reproduction and daily life), existing birds and their distribution in the world, with special reference to eastern North America, and the inter-relations of birds and man. As often as possible students will have the opportunity of studying birds in the field.

Lecturer: Prof. V. C. Wynne-Edwards.

Time: Thursdays, 8.15 p.m., commencing October 18th.

Place: Biological Building.

Fee: $5.00.

Philosophy

Introduction to Philosophy: 12 lectures. What philosophy is for the ordinary citizen and for the professional worker. The spirit and the message of philosophy,—how to get at this. The great thinkers and the different tendencies in philosophy.

CHESS CLUB

The first meeting of the Chess Club will be held on Tuesday afternoon from three to six in the Reading Room of the Union. Anyone interested is asked to see John Shepherd or one of the other officers between these hours. No particular skill is required.

R.V.C. '35

There will be a class meeting of R.V.C. '35 in Room 12 of the Arts Building at 1 o'clock today. Everyone is urged to be there as it is for the election of officers.

TOMORROW AND YESTERDAY

There is nothing new in government when it comes to the final sweeping analysis. Rather, there are at no time—nor are there to be—any changes in the basic processes of granting or withdrawing the mass rights of human beings.

That which we call fascism, or communism, shall reappear the day after tomorrow in new guise; our present democracy is already being infused with the spirit of other governmental types, supposedly new, supposedly revolutionary, but in essential character merely reincarnations of the immutable forms established by natural law.

In this larger sense, present trends and occurrences have no significance except as they bring about a flux from one to the other of various pre-established forms. They are secondary in themselves.

After a certain amount of freedom has been won by the masses from those who by selection, force of character or heredity have won the right to rule, inevitable abuses arise which bring a reactionary swing to more conservative principles.

Always and repeatedly this change must come in the history of a people banded together as a nation. As they have in past ages, so shall men in the future win and relinquish and win again their personal and group rights.

Progress may be made in material refinement of governmental concepts, but those concepts themselves remain static.

Conservative men protest changes now taking place in the structure of our own somewhat dubious democracy. They call upon the mute gods of their reactionary faith in abhorrence of moves which they believe are unprecedented.
